Ring template for printing out

Proof line

10 cm

Fold here

16   17   18   19   20   21   22   23   24

**1.** Print out the ring template in landscape format on DIN A4 paper.
Select 'No print adjustment' under the page settings so that the page prints in its original size. The proof line on the printed paper must be 10 centimetres long.

2. EITHER place one of the rings you already have on top of the circles and find the circle that matches, i.e. where the outside line is still visible inside your ring,
OR fold the sheet at the dotted line in the middle of the circles and cut out the half circles at the outside line. You'll then be able to check which one fits your finger.
